THE SMALL-SCALE INITIATIVES PROGRAM
FOR CIVIL SOCIETY ORGANISATIONS IN
NORTH AFRICA

2018-2021
THE PPI-OSCAN PROGRAM

The Small-scale Initiatives Program for Civil Society Organisations in North Africa, also known by its French acronym PPI-OSCAN, is a Program that aims to support young Civil Society Organisations (CSO) in the development of innovative initiatives which address the environment and sustainable development issues in North Africa.

The overall objective of PPI-OSCAN is to strengthen the technical, administrative and financial capacities of CSOs in four North African countries (Algeria, Libya, Morocco and Tunisia). The short-term impact would be an increase of CSO initiatives, which in the long-term, would contribute to the implementation of national strategies and action plans for biodiversity conservation and restoration, sustainable management of natural resources and mitigation of climate change effects.

WORKING THEMES

Interested Civil Society Organisations from the 4 target countries, submitted project proposals in line with the 3 following themes of the program:

- Conservation of species and ecosystems
- Co-management of land and marine protected areas
- Ecotourism and sharing of the benefits of conservation

PROJECTS

Since the program launched in 2014, two calls for proposals have led to 471 submissions, out of which, 80 projects were selected in the 4 target countries.

1st PHASE

- 248 projects presented
- 37 projects selected

2nd PHASE

- PPI-OSCAN (2018 - 2021)
- 223 projects presented
- 43 projects selected

The program is currently in its second phase. This brochure aims to present the 43 selected projects and their related associations.

STRATEGIC OBJECTIVES

1. To support projects on biodiversity conservation and valuation, sustainable natural resources management and climate change mitigation.
2. To strengthen CSOs administrative, technical and financial capacities.
3. To network CSOs and strengthen their capacity for dialogue with governments.
4. To capitalise and disseminate experiences nationally and regionally.

THE ADDED VALUE OF PPI-OSCAN

1. The promotion of the local, economic and social development of North African countries and building CSO capacity to actively and effectively participate in the sustainable development.
2. Its exemplary and innovative character regarding its supporting and capacity-building approach.
3. Its achievements can be both demonstrated and replicated at national and regional scales through the networking of CSOs and the promotion of dialogue opportunities with institutions.
4. Its global contribution to the environment preservation by focusing on priority fields of intervention in the target countries.

FINANCIAL PARTNERS OF THE PROGRAM

- The French Global Environment Facility (FFEM) - works in partnership with donors and international organisations. It funds projects that generate local environmental, social and economic benefits, and operates in the areas of biodiversity conservation, climate, international waters, land and ozone layer, and chemical pollution mitigation. The particular value of the FFEM is to rely on pilot projects to create learnings and disseminate their innovations on a larger scale.
- The MAVA Foundation - Founded in 1994 in Switzerland, MAVA Foundation for Nature, is a private foundation for the conservation of biodiversity for the benefit of humans and nature, that funds, mobilises and strengthens the conservation community in Switzerland, the Mediterranean and West Africa. It works in partnership with international, national and local NGOs, research institutions, universities, and sometimes government agencies. MAVA is in its final phase of operations and plans to cease funding in 2022.
- The IUCN Centre for Mediterranean Cooperation (IUCN-Med) - The International Union for the Conservation of Nature (IUCN) today represents the largest environmental network, with over 1,300 government and non-government members operating in 51 countries, in the world. Created in 1948, it is considered to be the largest and oldest organisation working for the protection and preservation of nature. The Union operates as a platform where governments, businesses, NGOs, experts and local communities work together to implement solutions to address environmental challenges. The IUCN Centre for Mediterranean Cooperation, which opened in 2001 in Malaga (Spain), aims to encourage and assist Mediterranean societies in integrating the conservation of natural resources with their use through the adoption of a sustainable development model.

RESPONSIBLE FOR IMPLEMENTATION

- IUCN Centre for Mediterranean Cooperation (IUCN-Med) - The International Union for the Conservation of Nature (IUCN) today represents the largest environmental network, with over 1,300 government and non-government members operating in 51 countries, in the world. Created in 1948, it is considered to be the largest and oldest organisation working for the protection and preservation of nature. The Union operates as a platform where governments, businesses, NGOs, experts and local communities work together to implement solutions to address environmental challenges. The IUCN Centre for Mediterranean Cooperation, which opened in 2001 in Malaga (Spain), aims to encourage and assist Mediterranean societies in integrating the conservation of natural resources with their use through the adoption of a sustainable development model.

NATIONAL PARTNERS OF THE PPI-OSCAN

- ALGERIA - Ministry of Environment and Renewable Energy with the General Forest Directorate
- LIBYA - Environment General Authority
- MOROCCO — Department of Water and Forest
- TUNISIA — Ministry of Local Affairs and Environment with the General Forest Directorate
Projects description

**ALG-02**

The project contributes to the reintroduction of the endemic species of Siltia tenacissima and Platicla atlantica, through a gene-bank collection. It will facilitate their dissemination and regeneration by pastoralists in a closed area. Activities on young education and public awareness will also be carried out.

*Al-Sefra, Naama, South-West Algeria*

- PPI-OSCAN Subvention: 18,000 €

**ALG-04**

**Association “The Green Earth”**

This association was created in 2018 from the initiative of local environmental executives. It aims to preserve the natural heritage whilst promoting cooperation and long-term citizens solidarity.

*Ferret Verta,46@hotmail.com*

**ALG-15**

The project aims to combat activities threatening the wetland classified as Ramsar in 2001 and IPA in 2016. It promotes ecotourism and educational activities that raise general public and student awareness on the importance of this type of ecosystem as a wintering and nesting habitat for migratory birds.

*Macta wetland, Mascara, west Algeria*

- Total budget: 28,000 €
- PPI-OSCAN Subvention: 27,000 €
- Green Association of Mascara

**ALG-31**

This association was created in 2015 to promote education and ecotourism. Activities consist of raising awareness, training and involving local inhabitants in agriculture, forestry and environmental projects.

*si_bachir@yahoo.fr*

**ALG-05**

The project aims to tackle the uncontrolled hybridisation of local bee populations while preserving the endemic species. Stations for controlled fertilisation will be created, as well as a local advocacy group including residents, associations and public institutions in the field of beekeeping.

*Bildia, Atlas Blidien, Nord Algeria*

- Total budget: 52,020 €
- PPI-OSCAN Subvention: 54,120 €
- Association for the Development of beekeeping in Mitida Bildia (ADAMBI)

**ALG-06**

The project aims to enhance the preservation of the Belezma National Park, one of the most important biodiversity hotspots, in partnership with the management team, local inhabitants and the environmental directorate. It will lead to the establishment of an education and ecocentre on local biodiversity.

*Belezma National Parc, Batna, East of Algeria*

- Total budget: 42,405 €
- PPI-OSCAN Subvention: 29,722 €
- Biology, Biodiversity & Sustainability Association

**ALG-38**

The project aims to combat the degradation of the cedar from Chelia forest through planting activities, raising awareness among residents and students about the environment, and enhancing beekeeping. It will support the classification of the area under the status of National Park.

*Tizi-Ouzou, Ohadchela, North Algeria*

- Total budget: 39,700 €
- PPI-OSCAN Subvention: 28,000 €
- Environment Association of Tachennit

**ALG-37**

**Association for the Development of the Atlas Cedar in Mount Cheila**

The project aims to tackle the degradation of the cedar from Cheila forest through planting activities, raising awareness among residents and students about the environment, and enhancing beekeeping. It will support the classification of the area under the status of National Park.

*Mount Cheila, Kenchela, East Algeria*

- Total budget: 20,504 €
- PPI-OSCAN Subvention: 14,352,80 €
- The Cedar Association for Environment Protection and Sustainable Development

**ALG-08**

**Macta wetland enhanced by sustainable local ecotourism**

The project contributes to the conservation of the Taghzbouth-Thawint area through the promotion of the rational use of water, rehabilitation and the preservation of water sources and local plants such as the saule. It also focuses on beekeeping and raising awareness about the environment.

*Macta wetland, Mascara, west Algeria*

- Total budget: 40,000 €
- PPI-OSCAN Subvention: 28,000 €
- Environment Association of Tachennit

**ALG-80**

The project aims to reinforce the irrigation system in the Miliana Garden created in 1860, and contributes to its classification as a “Botanical Garden” through an advocacy group. This reactivates the conservation of key species such as the sequoia (the only specimen in Algeria), girldgo, lime and yew.

*Mount Zaccar, Miliana, North of Algeria*

- Total budget: 30,000 €
- PPI-OSCAN Subvention: 21,000 €
- The pearl of Zaccar

**ALG-09**

**Construction of a small conservation farm for endangered species**

**Macta wetland**, Kabylie, Algeria*

The project aims to classify the wetland on the Boussaâda region by creating a farm for endangered species (inc. Rhodop沃尔玛 gazelles, and particularly endangered species. Environment Association of Tachennit

*Mount Zaccar, Miliana, North of Algeria*

- Total budget: 30,000 €
- PPI-OSCAN Subvention: 21,000 €
- The pearl of Zaccar

**ALG-30**

**Preservation of the Atlas Cedar in Mount Cheila**

The project aims to combat the degradation of the cedar from Cheila forest through planting activities, raising awareness among residents and students about the environment, and enhancing beekeeping. It will support the classification of the area under the status of National Park.

*Mount Cheila, Kenchela, East Algeria*

- Total budget: 20,504 €
- PPI-OSCAN Subvention: 14,352,80 €
- The Cedar Association for Environment Protection and Sustainable Development

**ALG-07**

**Restoration and preservation of Miliana Garden**

The project aims to reinforce the irrigation system in the Miliana Garden created in 1860, and contributes to its classification as a “Botanical Garden” through an advocacy group. This reactivates the conservation of key species such as the sequoia (the only specimen in Algeria), girldgo, lime and yew.

*Mount Zaccar, Miliana, North of Algeria*

- Total budget: 30,000 €
- PPI-OSCAN Subvention: 21,000 €
- The pearl of Zaccar

**ALG-83**

**Biocultural corridor for the preservation of the Cuvier’s Gazelle**

The project focuses on the conservation of the Cuvier’s gazelle through the installation of a natural corridor, the development of water sources, the establishment of a monitoring system in partnership with the forest service, the sensitisation of the population and the education of young people.

*Si_bachir@yahoo.fr*

**ALG-39**

**Development of ecotourism in the Boussaidra region (mountain area, steppes area and wetland)**

The objective is to reduce impact of visitors on the Boussaidra region by creating a warning system on damages caused to biodiversity, in partnership with the University of MSia and students from the environmental education program. It will also include activities on capacity building for local CSOs.

*Boussaidra, steppes area in the North of Algeria*

- Total budget: 22,142 €
- PPI-OSCAN Subvention: 15,500 €
- Moubadara Association for Social Protection and Sustainable Development

**ALG-78**

**Ougghename Garden**

Creation of a small farm of Dorax gazelles as an educational space for young people and the preservation of this local species and other endangered ones. Actions directed at local authorities will also be carried out to improve the livelihoods of Miliana citizens.

*Boussaidra, steppes area in the North of Algeria*

- Total budget: 28,000 €
- PPI-OSCAN Subvention: 19,600 €
- Association “L’Epé d’Or”

**ALG-36**

**Miliana Garden**

This local association was created in 2013 in order to protect the environment and to improve the livelihoods of Miliana citizens.

*Boussaidra, steppes area in the North of Algeria*

- Total budget: 28,000 €
- PPI-OSCAN Subvention: 19,600 €
- Association “L’Epé d’Or”

**ALG-37**

**Restoration of the Atlas Cedar in Mount Cheila**

The project aims to reinforce the irrigation system in the Miliana Garden created in 1860, and contributes to its classification as a “Botanical Garden” through an advocacy group. This reactivates the conservation of key species such as the sequoia (the only specimen in Algeria), girldgo, lime and yew.

*Mount Zaccar, Miliana, North of Algeria*

- Total budget: 30,000 €
- PPI-OSCAN Subvention: 21,000 €
- The pearl of Zaccar

**ALG-80**

**Miliana Garden**

This local association was created in 2013 in order to protect the environment and vulnerable ecosystems, promoting eco-citizenship, citizen participation, and environmental education.

*affak@hotmail.fr*

**ALG-43**

**Development of ecotourism in the Boussaidra region (mountain area, steppes area and wetland)**

The objective is to enhance the natural and cultural heritage of Ouled Yahia Oasis in Tamernt, classified as RAMSAR Site. It will promote ecotourism and local crafts, the protection of the dunes and natural resources and the empowerment of local governance.

*Tadjoura, Laghouat, South of Algeria*

- Total budget: 30,000 €
- PPI-OSCAN Subvention: 21,000 €
- Tamernt, Adrar, South of Algeria

**ALG-48**

**Creation of a small farm of Dorax gazelles as an educational space for young people and the preservation of this local species and other endangered ones. Actions directed at local authorities will also be carried out to improve the livelihoods of Miliana citizens.**

*Boussaidra, steppes area in the North of Algeria*

- Total budget: 28,000 €
- PPI-OSCAN Subvention: 19,600 €
- Association “L’Epé d’Or”

**ALG-78**

**Ougghename Garden**

Creation of a small farm of Dorax gazelles as an educational space for young people and the preservation of this local species and other endangered ones. Actions directed at local authorities will also be carried out to improve the livelihoods of Miliana citizens. It will promote ecotourism and local crafts, the protection of the dunes and natural resources and the empowerment of local governance.

*Boussaidra, steppes area in the North of Algeria*

- Total budget: 28,000 €
- PPI-OSCAN Subvention: 19,600 €
- Association “L’Epé d’Or”

**ALG-80**

**Miliana Garden**

This local association was created in 2013 in order to protect the environment and vulnerable ecosystems, promoting eco-citizenship, citizen participation, and environmental education.

**LYB-01**
Together for the sustainable development of the coastline

The project area is located within 110 km of coastal areas, east of the capital Tripoli. Activities are aimed at supporting national efforts to conserve marine and coastal ecosystems by raising awareness and updating information on the condition of current natural resources.

- **Eastern Tadjourah City**
  - Total budget: 28,006,00 €
  - PPI-OSCAN Subvention: 19,604,20 €

**Lybian Marine Science Association**

As a member of the Maghreb marine science society, this association works with actors from the public and private sector to preserve the marine ecosystem through activities such as raising awareness and conducting scientific studies.

- [dawhaddoud@yahoo.com](mailto:dawhaddoud@yahoo.com)

**LYB-04**
Environmental awareness in schools

The project targets 25 public and private schools in the city of Derna through visits on nature conservation both in the field and in schools. It implements interactive activities to educate students about local environmental issues and how to deal with them.

- **City of Derna**
  - Total budget: 38,428,58 €
  - PPI-OSCAN Subvention: 26,300 €

**Alkhdhra Association for Environmental Activities**

Created in 2018 by young activists volunteering for the environment, this association denounces local environmental problems and works for nature conservation and sustainable development.

- [abodybohlab@gmail.com](mailto:abodybohlab@gmail.com)

**LYB-06**
TogetheR to strengthen the natural heritage of Wadi Al Naqa

The village of Basas located in the Wady Alhaya Valley, has a rich natural and cultural heritage. The project will focus on nature conservation, sustainability of natural resources, a search for solutions to climate change and associated economic challenges in a fragile ecosystem.

- **City of Derna**
  - Total budget: 39,877,15 €
  - PPI-OSCAN Subvention: 27,914 €

**Alhaya Organisation for the Protection of Marine and Wildlife Organisms**

This association was one of the founders of the Lybian Union for Biodiversity and Climate Change and has worked with IUCN since 2016. Its actions focus on the participation of young people and women in nature conservation.

- [organizationalhayat@gmail.com](mailto:organizationalhayat@gmail.com)

**LYB-02**
Restoration of a burned forest

The project aims to reduce illegal trafficking of animal species. It is situated in Libya’s eastern border, which is home to one of the main routes of illegal wildlife trade. The actions focus on raising awareness and creating a rescue centre to shelter and reintroduce intercepted species to their habitats.

- **North of Shahilah City**
  - Total budget: 70,989 €
  - PPI-OSCAN Subvention: 30,000 €

**New Libya**

This association works for the conservation of forests and their resources through the use of modern technologies. It works in partnership with international partners and institutions to improve local socio-economic conditions.

- [libyathee@nibya.org](mailto:libyathee@nibya.org)

**LYB-05**
Lybian Natural Biodiversity Relief Centre

The objective is the restoration of a forest ecosystem of 301 hectares in the Cyrenaica region, which represents 25% of the total plant species affected by the fires occurring in 2013 and 2014. The project includes awareness-raising activities, water retention practices and reforestation of these areas.

- **Al-Naqaza National Park**
  - Total budget: 39,877,15 €
  - PPI-OSCAN Subvention: 27,914 €

**Alhaya Organisation for the Protection of Marine and Wildlife Organisms**

This association was one of the founders of the Lybian Union for Biodiversity and Climate Change and has worked with IUCN since 2016. Its actions focus on the participation of young people and women in nature conservation.

- [organizationalhayat@gmail.com](mailto:organizationalhayat@gmail.com)

**LYB-07**
Contribution to Mislata National Park Management Plan

The objective of the project is to implement IUCN’s recommendations for the planning of protected areas to address the problems of representation and coordination between the sectors in charge and to propose a management plan for the National Park. It will perpetuate the results and products derived from PPI-OSCAN 1.

- **Alkhaizen Village - Alshatien**
  - Total budget: 57,020,59 €
  - PPI-OSCAN Subvention: 39,920,65 €

**Alhaya Organisation for the Protection of Marine and Wildlife Organisms**

This association was one of the founders of the Lybian Union for Biodiversity and Climate Change and has worked with IUCN since 2016. Its actions focus on the participation of young people and women in nature conservation.

- [organizationalhayat@gmail.com](mailto:organizationalhayat@gmail.com)

**LYB-08**
Lybian Wildlife Trust

Is member of the Lybian Union for Biodiversity and Climate Change, and a beneficiary of PPI-OSCAN 1. It works in partnership with international organisations, governments and CSOs for wildlife conservation.

- [info@lwtt.ly](mailto:info@lwtt.ly)

**LYB-10**
Najjas residents participate in the reintroductio of endangered species

The project aims to restore the ecosystem of Al-Naqaza National Park through the implementation of an irrigation system for hilltops, planting plants containing ecological and economic values, taking measures to reduce fire risks and the introduction of a digital data archiving system to ease decision-making.

- **Al-Naqaza National Park**
  - Total budget: 40,000 €
  - PPI-OSCAN Subvention: 27,999,51 €

**Alhaya Organisation for the Protection of Marine and Wildlife Organisms**

This association was one of the founders of the Lybian Union for Biodiversity and Climate Change and has worked with IUCN since 2016. Its actions focus on the participation of young people and women in nature conservation.

- [alhaya.nga@gmail.com](mailto:alhaya.nga@gmail.com)

**LYB-12**
Restoration of Sifanes water sources

Located in a coastal area of 20 hectares, Ain Kaam is a water source threatened by the accumulation of debris and rubble. Project activities aim to improve the conservation of the area through an inventory of the natural resources, its recognition as a valuable wetland and the promotion of ecotourism.

- **City of Zliten**
  - Total budget: 42,000 €
  - PPI-OSCAN Subvention: 29,999,51 €

**Alhaya Organisation for the Protection of Marine and Wildlife Organisms**

This association was one of the founders of the Lybian Union for Biodiversity and Climate Change and has worked with IUCN since 2016. Its actions focus on the participation of young people and women in nature conservation.

- [alhaya.nga@gmail.com](mailto:alhaya.nga@gmail.com)

**LYB-13**
Illustrated Guide on Mislata and Al Khoms plants

The objective is the preparation of a nature guide in Arabic and English for students, researchers and specialists in plant biodiversity. In continuity with the PPI-OSCAN 1, it contributes to the awareness-raising activities on vegetation cover in a mountainous area. It includes capacity-building workshops.

- **Municipalities of Mislata and Al Khoms**
  - Total budget: 41,575,14 €
  - PPI-OSCAN Subvention: 29,102,60 €

**Tree Friends Association**

Created in 2002, this association now has several offices in Libyan cities and carries out several regional initiatives. It aims to raise awareness about the importance of plant biodiversity and conservation.

- [matnab.ohajara@gmail.com](mailto:matnab.ohajara@gmail.com)

**LYB-09**
Setting up a bee yard

Through the promotion of the cultural and natural heritage of the Anezi region, this project aims to enhance responsible tourism and improve local economy. It intends to raise awareness among local actors about the need to preserve this heritage in order to achieve long-term and sustainable benefits.

- **Tnine Aday**
  - Total budget: 17,935,92 €
  - PPI-OSCAN Subvention: 12,548,07 €

**Union APINECTARDEV**

Union of cooperatives created in 2016, with the mission of improving the living conditions of members, valuing and marketing local products and safeguarding the local bee species.

- [apinectardev@gmail.com](mailto:apinectardev@gmail.com)

**MAR-07**
Valuation of the ecotourism appeal of the Anezi territory natural and cultural heritage

Through the promotion of the cultural and natural heritage of the Anezi region, this project aims to enhance responsible tourism and improve local economy. It intends to raise awareness among local actors about the need to preserve this heritage in order to achieve long-term and sustainable benefits.

- **Tnine Aday**
  - Total budget: 17,935,92 €
  - PPI-OSCAN Subvention: 12,548,07 €

**Union APINECTARDEV**

Union of cooperatives created in 2016, with the mission of improving the living conditions of members, valuing and marketing local products and safeguarding the local bee species.

- [apinectardev@gmail.com](mailto:apinectardev@gmail.com)

**MAR-03**
Setting up a bee yard

The city of Zliten aims to support beekeepers and farmers in Zliten in creating new beehives to improve their knowledge of beekeeping and help them to promote and develop honey production.

- **Tizi Ntakoucht**
  - Total budget: 42,856 €
  - PPI-OSCAN Subvention: 29,999,20 €

**Union APINECTARDEV**

Union of cooperatives created in 2016, with the mission of improving the living conditions of members, valuing and marketing local products and safeguarding the local bee species.

- [apinectardev@gmail.com](mailto:apinectardev@gmail.com)
### MAR-09 Development of ecotourism in Al Hoceima National Park

**Project Objectives**
- Development of ecotourism in the park
- Promotion of local biodiversity

**Activities**
- Development of ecotourism facilities
- Promotion of local biodiversity

**Funding**
- Total budget: 42,450.10 €
- PPI-OSCAN Subvention: 25,715.07 €

**Contact**
- bne_yitif_snada@yahoo.com

### MAR-14 Valorisation of the futur National Park «Deras Ouargiz Labtana» biodiversity

**Project Objectives**
- Valorisation of biodiversity
- Promotion of local tourism

**Activities**
- Creation of an information and interpretation centre
- Promotion of local biodiversity

**Funding**
- Total budget: 42,000.00 €
- PPI-OSCAN Subvention: 29,400.00 €

**Contact**
- akhtzan.dev@gmail.com

### MAR-26 Creation of a geospatial database and GPS tracking of raptors in Morocco

**Project Objectives**
- Creation of a geospatial database
- Tracking of raptors

**Activities**
- Creation of a geospatial database
- Tracking of raptors

**Funding**
- Total budget: 41,525.26 €
- PPI-OSCAN Subvention: 29,067.68 €

**Contact**
- taldart association.tdraede@gmail.com

### TUN-09 Promotion of alternative maritime tourism in the Zarzis region

**Project Objectives**
- Promotion of maritime tourism
- Preservation of marine biodiversity

**Activities**
- Promotion of alternative maritime tourism
- Preservation of marine biodiversity

**Funding**
- Total budget: 23,000 €
- PPI-OSCAN Subvention: 16,100 €

**Contact**
- association.fisherman@gmail.com
- CHERE Gafsa - Culture History Renewable Energy Restoration Environment. The project is located in the Natural Reserve of Jebel Orbata. Its objective is to strengthen the protection of the reserve by implementing actions which promote environmental, economic and cultural values.

Gafsa Association for Young People Futures. This association was created in April 2017 to develop actions strengthening young people capacities in different development sectors and raise awareness on environmental and cultural issues.

- On the Footsteps of Tunisia’s Stealth Predators

This project aims to enforce the observation and protection of carnivores in the arid areas of Buhenmeda and Jbel Orbata. A database on the ecology of populations of species such as sand cats, caracals and wild cats will be created with a map of their distribution.

Gafsa Association for Young People, children and women. This association was created in 2013. Its actions focus on involving women and youths in local governance and to strengthen their capacity to cope with climate change.

- Contribution to the preservation of the Bni Mtit forest through the development of ecotourism

The project aims to improve the conservation of ecosystem services which are valuable for the local populations of Bni Mtit and to promote ecotourism within the forest. Activities will be set up to sensitise different stakeholders about the role of ecotourism in nature conservation and local development.

- Contribution to the establishment of an ecological observatory in the Medjbera River

The project aims to set up a monitoring and evaluation protocol for the establishment of an environmental observatory on the Medjbera. It will foster collaboration and the transmission of skills between stakeholders regarding the development and implementation of evaluation indicators.

- Preservation of medicinal plants in the Region of Bizerte - Teskreya and Oued Zitoun

This project encourages the preservation of medicinal plants through the establishment of a database on the ecology of populations of natural resources in the regions of Bizerte and Oued Zitoun. It will foster the establishment of an ecological observatory on the Medjbera.

- Environmental Corridors within the Oued Tine

This project contributes to the promotion of good agricultural and ecological practices. The establishment of ecological corridors within the Oued Tine is done with the help of local partners. It will improve the conservation of wildlife and floristic biodiversity of this fragile area.

- Declaration of the region of Bizerte - Teskreya and Oued Zitoun

The project will ensure the continuity of the previous one from the PPI-OSCAN 1 on the conservation of wetland biodiversity through the preservation and valorisation of plant species. It will involve all stakeholders in a participative management of natural resources in the Sebkha of the Soliman region.

- Protection of the Environment (A2PE)

This association was created in March 2017. Its mission is to develop the capacities and awareness of young people to deal with future environmental challenges and issues related to sustainable development.

- Exploralis

This association was created in June 2014 to promote ecosystems conservation, sustainable development of environmental networks, and the communication and mediationisation of environmental issues.

- Association for Environmental Protection and the Sustainable Development of Bizerte

Founded in June 2010, it works for the sustainable development of the region, promoting environmental education and citizen awareness about nature protection.

- Association for the Promotion and Protection of the Environment (A2PE) Bizerte

It aims to enhance the importance attached to the olive forest, currently threatened by urban expansion. A participative working approach will be established with the local population to encourage responsible forestry activities and the respect of the natural, historical and cultural heritage of the area.

- Friends of Cape Tunisia Association

Founded in September 2017, it contributes to efforts towards mitigation of the effects of climate change, to develop solidarity between farmers and to improve the agro-ecosystems resilience.

- Friends of Cape Tunisia Association

The project aims to promote the practice of hiking, the protection of the environment and development of ecotourism.

- Tunisian Association for the Promotion and Protection of the Environment (A2PE) Bizerte

The project will take place in 3 wetlands from the island of Djerba: Ras Ermal, Oued Es-Siala and Bin El Ouediane, all known for their great natural value. It integrates a participatory and community-based approach to promote ecotourism activities as a sustainable development alternative.

- Citizens and Sustainable Development Association

This association was created in January 2018 to promote local sustainable development. Its actions aim to strengthen citizens’ involvement in public and economic affairs and networks with key representatives.
